

MetaMask Guide

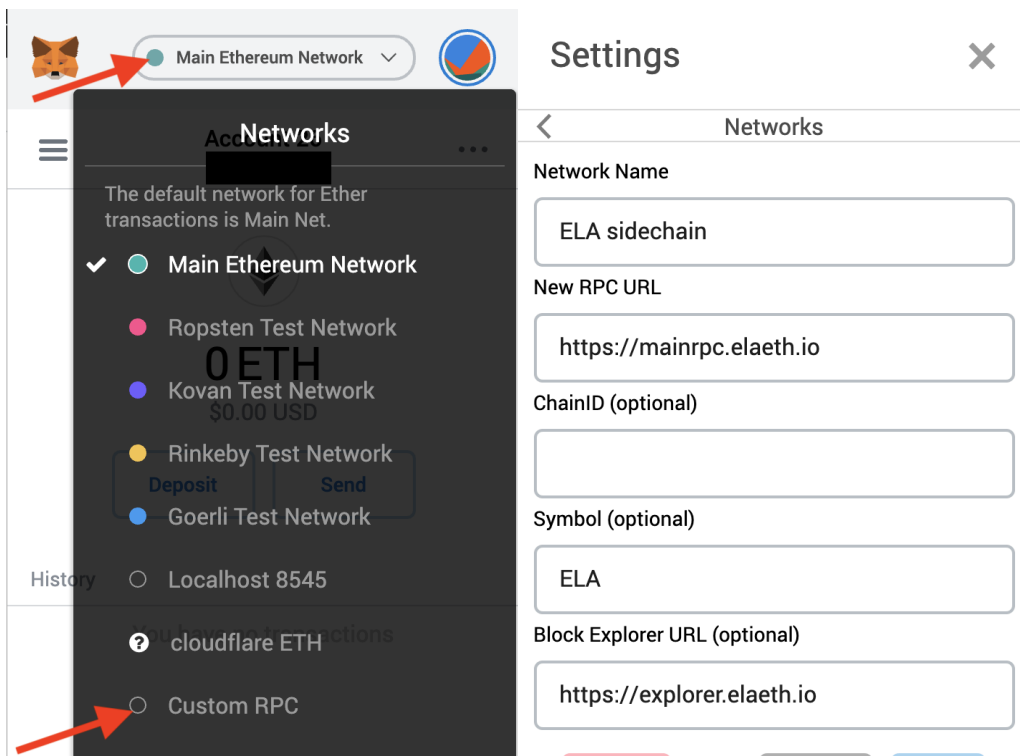

1. Install MetaMask

You must have installed the Chrome, Firefox or Brave.

You can access below URL for downloading and installing the MetaMask.

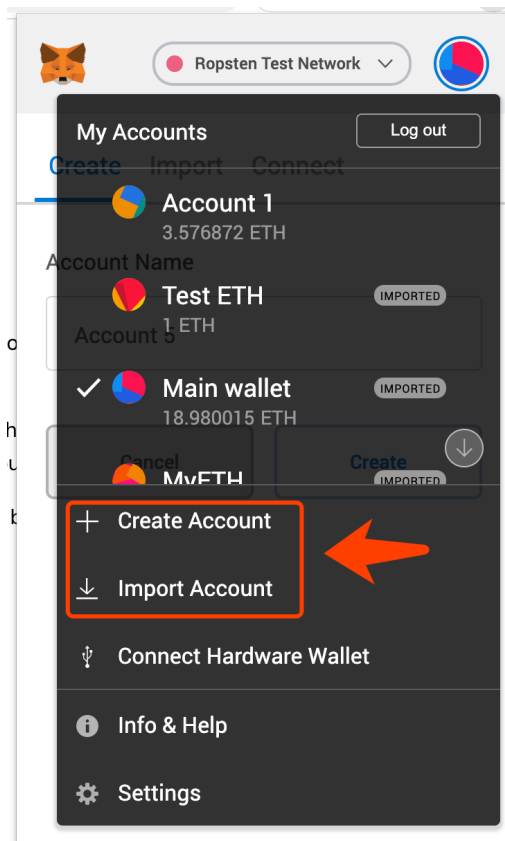

<https://metamask.io/>

2. Connect to the Elastos sidechain

Above is the network setting.

3. Create a wallet or import a wallet

If you want to import your elephant wallet to MetaMask, you need get your private key at first. You can open <https://elephant.app/mnemonic.html> and enter your mnemonics, the page will generate your private key in the below table.

You can enter an existing BIP39 mnemonic, or generate a new random one.

GENERATE

Mnemonic phrase cheap sort emotion either crouch garage mammal sugar puppy avocado angle

Seed 42f38247a045d9221f4b79b23462beb6b518ff0e2c18ba37a9a16baebc9db47cab257bcc5a81cb2cf20e9fc8ed74563e5aa4827920a529191aeb5384462625b9

Coin ETH - Ethereum

path m/44'/60'/0'/0

Derived Addresses

Note these addresses are derived from the BIP32 Extended Key

☐ Use hardened addresses

Table CSV

Path	Address	Public Key	Private Key
m/44'/60'/0'/0/0	0x04B5766aA2Ac56ccB6847FE71c7bbc411D1965F8	0x034e828a2a65db28836b6ef0e33689b7d9c992f6e656bf97d1f9c3be364c0dc931	0x70c88beeb5015a37a81b8af0f
m/44'/60'/0'/0/1	0x952A34eb0FACE29c16C0F6Ecb7fa6e52884A6311	0x025d20effaa610bbad6ab7ac4fe665240ca8e9be00b1fc51b5760ff39b444dba48	0xdeea4c62cbad833e7d7d9056

Please copy that private key to MetaMask. Note, please double check the address after imported.

4. To recharge MetaMask

You can directly transfer ELA/ETHSC to your MetaMask address. If you have no ELA/ETHSC, you can use the below URL to convert ELA into your MetaMask wallet.

```
https://transfer.elaphant.app/?dstaddress=[Your_MetaMask_Address]
```

5. Enjoy!

Congratulation, you are ready for getting a blockchain name.

You can find your name on [Register](#)

You can manage your names on [Account](#)

And you also can set your name on there.

Enjoy it.
